Healthcare Security
The Cure to Securing Your Networks

"No healthcare organization is immune to a data breach."

#1
industry of records compromised

92 Million
individuals affected by healthcare breaches in 2015

45%
of healthcare organizations have had 5 or more breaches
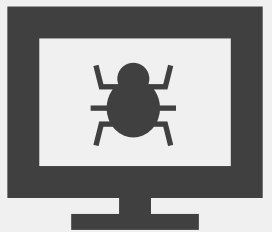

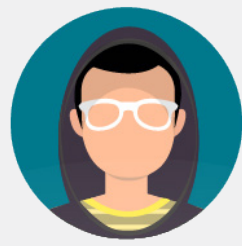

90%
of healthcare organizations had a data breach in the last 2 yrs

$2.2 Million
average cost of a data breach in the healthcare industry

Criminal attacks are the leading cause of data breaches

Ransomware, malware and DoS attacks are the most concerning cyber threats

Security threats healthcare organizations worry about most

Employee Negligence

Mobile Device Insecurity

Cyber Attackers

Public Cloud Services

$363
average cost per lost or stolen medical record

Keeping your patients' info secure

Visibility - Healthcare IT needs network visibility of user activities on how data is being shared and who is accessing the data

VM Applications

Pattern Matching/ Protocol Stripping

SOLUTIONS FOR FULL NETWORK VISIBILITY

Deduplication/ Packet Slicing

All-in-one monitoring appliance

A check list to help you start securing your healthcare network

- [ ] Identify network links that need monitoring
- [ ] Identify the types of monitoring (performance, application, security)
- [ ] Select a data monitoring switch that will condition data to the traffic probes
- [ ] Select a data monitoring switch that will increase efficiency of the traffic probes
- [ ] Consider advanced monitoring features to support full network visibility
- [ ] Consider need for integrating VM analysis tools on network monitor appliance
